SUBJECT INDEX

Volume 54 (1988)

Abscisic acid, lipid vesicle, vesicle aggregation, phospholipid, phospholipid bilayer, 245
Actinidia chinesis, protoplast culture step induction method, plant regeneration, 231
Adaptation, *Datura innoxia*, *Vinca minor*, callus culture, β-galactosidase, galactose, lactase, lactose, 83
Alcohol dehydrogenase, anaerobiosis, induction, rice, root, 29
Akaloid biosynthesis, *Nicotiana* rustica, plant amines, cadaverine (1,5-diaminopetane), root cultures, (transformed), 125
Alternate pathway, anoxia, cyanide resistance, cytochromes, O_2 consumption ability, *Euglena*, 193
5-Aminolevulinic acid (ALA) synthesis, oxygen (O_2) requirement in the light, stimulation by oxaloacetic acid (OAA), 185
Anaerobiosis, alcohol dehydrogenase, induction, rice, root, 29
Anoxia, cyanide resistance, cytochromes, O_2 consumption ability, *Euglena*, alternate pathway, 193
Apple dormancy, embryonic axes, cotyledons, callus, plant regeneration, 147
Auxin action, elongation growth, tissue tension, cell wall synthesis, 23
Auxin antagonists, proton secretion, plant growth effectors, auxins, ethylene, fusicoccin, 37
Auxins, proton secretion, plant growth effectors, auxin antagonists, ethylene, fusicoccin, 37

Barley, nitrate, nitrate reductase, endosperm, embryos, 141
Brassica campestris L., ethylene, 2,5-norbonadiene, leaf development, flowering, 75
Brassinosteroid, *Daucus carota* L., plant cell culture, cell growth, 153

Ca^{2+} transport, calmodulin, membrane vesicles, *Zea mays*, 103
Cadaverine (1,5-diaminopetane), *Nicotiana rustica*, plant amines, root cultures (transformed), alkaloid biosynthesis, 125
Callose, *Glycine max*, glyceollin, induced resistance, elicitors, *Phytophthora megasperma*, 203
Callus, apple dormancy, embryonic axes, cotyledons, plant regeneration, 147
Callus culture, cotyledon explants, organogenesis, in vitro plant regeneration, *Olea europaea* L., 65
–, *Datura innoxia*, *Vinca minor*, adaptation, β-galactosidase, galactose, lactase, lactose, 83
Calmodulin, Ca^{2+} transport, membrane vesicles, *Zea mays*, 103
Catharanthus roseus, glyphosate-tolerance, 55
Cell growth, *Daucus carota* L., plant cell culture, Brassinosteroid, 153
Cell wall synthesis, auxin action, elongation growth, tissue tension, 23
Chitinase mRNA induction, β-1,3-glucanase mRNA induction, pathogenesis-related proteins, *Nicotiana tabacum*, tobacco mosaic virus, 171
Chromosome doubling, wheat haploids, nitrous oxide, colchicine, 219
Colchicine, chromosome doubling, wheat haploids, nitrous oxide, 219
Corn, H^+-ATPase, plasma membrane, proteoliposomes, proton translocation, 177
Cotyledon, *Vicia faba*, pollination, culture in vitro, temperature, growth, 223
Cotyledon explants, callus culture, organogenesis, in vitro plant regeneration, *Olea europaea* L., 65
Cotyledons, apple dormancy, embryonic axes, callus, plant regeneration, 147
Culture in vitro, *Vicia faba*, pollination, temperature, growth, cotyledon, 223
Cyanide resistance, anoxia, cytochromes, O_2 consumption ability, *Euglena*, alternate pathway, 193
Cytochrome *c* oxidase activity, ellipticine derivatives, plant mitochondria, potato tuber, electron transport, uncouplers, inhibitors, 109
Cytochromes, anoxia, cyanide resistance, O_2 consumption ability, *Euglena*, alternate pathway, 193

Datura innoxia, *Vinca minor*, adaptation, callus culture, β-galactosidase, galastose, lactase, lactose, 83
Daucus carota, developmental mutant, protoplast fusion, 157
Daucus carota L., plant cell culture, Brassinosteroid, cell growth, 153
Developmental mutant, *Daucus carota*, protoplast fusion, 157
DNA methylation, glutelin-2, maize, genome organization, 211
Drechslera oryzae, ophiobolins, sesterterpenoids, phytotoxin, rice, 237

Electron transport, ellipticine derivatives, plant mitochondria, potato tuber, cytochrome *c* oxidase activity, uncouplers, inhibitors, 109
Electrophysiology, fruit trees, tissue culture, protoplasts, plant regeneration, 165
Elicitors, *Glycine max*, glyceollin, callose, induced resistance, *Phytophthora megasperma*, 203
Ellipticine derivatives, plant mitochondria, potato tuber, electron transport, cytochrome *c* oxidase activity, uncouplers, inhibitors, 109
Elongation growth, auxin action, tissue tension, cell wall synthesis, 23
Embryos, nitrate, nitrate reductase, endosperm, barley, 141
Embryonic axes, apple dormancy, cotyledons, callus, plant regeneration, 147
Endosperm, nitrate, nitrate reductase, embryos, barley, 141
Ethylene, *Brassica campestris* L., 2,5-norbornadiene, leaf development, flowering, 75
—, proton secretion, plant growth effectors, auxins, auxin antagonists fusicoccin, 37
Euglena, anoxia, cyanide resistance, cytochromes, O_2 consumption ability, alternate pathway, 193

Flowering, *Brassica campestris* L., ethylene, 2,5-norbornadiene, leaf development, 75
Fruit trees, tissue culture, protoplasts, electrophysiology, plant regeneration, 165
Fusicoccin, plasma membrane, H^+-ATPase, Triton X-100, temperature, 117
Fusicoccin, proton secretion, plant growth effectors, auxins, auxin antagonists ethylene, 37

Genome organization, glutelin-2, maize, DNA methylation, 211
Galactose, *Datura innoxia*, *Vinca minor*, adaptation, callus culture, β-galactosidase, lactase, lactose, 83
β-galactosidase, *Datura innoxia*, *Vinca minor*, adaptation, callus culture, galactose, lactase, lactose, 83
β-1,3-Glucanase mRNA induction, chitinase mRNA induction, pathogenesis-related proteins, *Nicotiana* tabacum, tobacco mosaic virus, 171
Glutelin-2, maize, genome organization, DNA methylation, 211
Glyceollin, *Glycine max*, callose, induced resistance, elicitors, Phytophthora megasperma, 203
Glycine max, glyceollin, callose, induced resistance, elicitors, *Phytophthora megasperma*, 203
Glyphosate-tolerance, *Catharanthus roseus*, 55
Green leaves, oleate desaturation, phosphatidylcholine, molecular species, *Pisum sativum*, 93
Growth, *Vicia faba*, pollination, culture in vitro, temperature, cotyledon, 223

H^+-ATPase, corn, plasma membrane, proteoliposomes, proton translocation, 177
H^+-ATPase, plasma membrane, fusicoccin, Triton X-100, temperature, 117
Helianthus, invertase, immunoselection, invertase biosynthesis, polysomes, 45

Immunoselection, *Helianthus*, invertase, invertase biosynthesis, polysomes, 45
Induced resistance, *Glycine max*, glyceollin, callose, elicitors, *Phytophthora megasperma*, 203
Induction, alcohol dehydrogenase, anaerobiosis, rice, root, 29
Inhibitors, ellipticine derivatives, plant mitochondria, potato tuber, electron transport, cytochrome *c* oxidase activity, uncouplers, 109
Invertase, *Helianthus*, immunoselection, invertase biosynthesis, polysomes, 45
Invertase biosynthesis, *Helianthus*, invertase, immunoselection, polysomes, 45
In vitro plant regeneration, callus culture, cotyledon explants, organogenesis, *Olea europaea* L., 65

Lactase, *Datura innoxia*, *Vinca minor*, adaptation, callus culture, β-galactosidase, galactose, lactose, 83.
Leaf development, *Brassica campestris L.*, ethylene, 2,3-norbornadiene, flowering, 75
Lipid vesicle, abscisic acid, vesicle aggregation, phospholipid, phospholipid bilayer, 245

Maize, glutelin-2, genome organization, DNA methylation, 211
Membrane vesicles, calmodulin, Ca^{2+} transport, *Zea mays*, 103
Molecular species, oleate desaturation, phosphatidylcholine, *Pisum sativum*, green leaves, 93

Nicotiana rustica, plant amines, cadaverine (1, 5-diaminopetane), root cultures (transformed), alkaloid biosynthesis, 125
Nicotiana tabacum, chitinase mRNA induction, β-1, 3-glucanase mRNA induction, pathogenesis-related proteins, tobacco mosaic virus, 171
Nitrate, nitrate reductase, endosperm, embryos, barley, 141
Nitrate reductase, nitrate, endosperm, embryos, barley, 141
Nitrous oxide, chromosome doubling, wheat haploids, colchicine, 219
2, 3-Norbornadiene, *Brassica campestris* L., ethylene, leaf development, flowering, 75

O_2 consumption ability, anoxia, cyanide resistance, cytochromes, *Euglena*, alternate pathway, 193
Oleate desaturation, phosphatidylcholine, molecular species, *Pisum sativum*, green leaves, 93
Olea europaea L., callus culture, cotyledon explants, organogenesis, in vitro plant regeneration, 65
Ophiobolins, *Drechslera oryzae*, sesterterpenoids, phytotoxin, rice, 237

Organogenesis, callus culture, cotyledon explants, in vitro plant regeneration, *Olea europaea* L., 65
Oxygen (O_2) requirement in the light, 5-aminolevulinic acid (ALA) synthesis, stimulation by oxaloacetic acid (OAA), 185

Pathogenesis-related proteins, chitinase mRNA induction, β-1,3-glucanase mRNA induction, *Nicotiana tabacum*, tobacco mosaic virus, 171
Phosphatidylcholine, oleate desaturation, molecular species, *Pisum sativum*, green leaves, 93
Phospholipid, abscisic acid, lipid vesicle, vesicle aggregation, phospholipid bilayer, 245
Phospholipid bilayer, abscisic acid, lipid vesicle, vesicle aggregation, phospholipid, 245
Photorespiration, photosynthesis, respiration, sucrose metabolism, 11
Photosynthesis, photorespiration, respiration, sucrose metabolism, 11
Phytophthora megasperma, *Glycine max*, glyceollin, callose, induced resistance, elicitors, 203
Phytotoxin, *Drechslera oryzae*, ophiobolins, sesterterpenoids, rice, 237
Pisum sativum, oleate desaturation, phosphatidylcholine, molecular species, green leaves, 93
Plant amines, *Nicotiana rustica*, cadaverine (1, 5-diaminopetane), root cultures (transformed), alkaloid biosynthesis, 125
Plant cell culture, *Daucus carota* L., Brassinosteroid, cell growth, 153
Plant growth effectors, proton secretion, auxins, auxin antagonists ethylene, fusicoccin, 37
Plant mitochondria, ellipticine derivatives, potato tuber, electron transport, cytochrome *c* oxidase activity, uncouplers, inhibitors, 109
Plant regeneration, *Actinidia chinesis*, protoplast culture step induction method, 231
—, apple dormancy, embryonic axes, cotyledons, callus, 147
—, fruit trees, tissue culture, protoplasts, electrophysiology, 165
Plasma membrane, H^+-ATPase, corn, proteoliposomes, proton translocation, 177
—, H^+-ATPase, fusicoccin, Triton X-100, temperature, 117
Pollination, *Vicia faba*, culture in vitro, temperature, growth, cotyledon, 223
Polysomes, *Helianthus*, invertase, immunoselection, invertase biosynthesis, 45
Potato tuber, ellipticine derivatives, plant mitochondria, electron transport, cytochrome *c* oxidase activity, uncouplers, inhibitors, 109
Protein synthesis, scraping, 133
Proteoliposomes, H^+-ATPase, corn, plasma membrane, proton translocation, 177
Proton secretion, plant growth effectors, auxins, auxin antagonists ethylene, fusicoccin, 37
Proton translocation, H^+-ATPase, corn, plasma membrane, proteoliposomes, 177
Protoplast culture *Actinidia chinesis*, step induction method, plant regeneration, 231
Protoplasts, fruit trees, tissue culture, electrophysiology, plant regeneration, 165
Protoplast fusion, *Daucus carota*, developmental mutant, 157

Respiration, photosynthesis, photorespiration, sucrose metabolism, 11
Rice, alcohol dehydrogenase, anaerobiosis, induction, root, 29
Rice, *Drechslera oryzae*, ophiobolins, sesterterpenoids, phytotoxin, 237
Root, alcohol dehydrogenase, anaerobiosis, induction, rice, 29
Root cultures (transformed), *Nicotiana rustica*, plant amines, cadaverine (1,5-diaminopetane), alkaloid biosynthesis, 125

Scraping, protein synthesis, 133
Sesterterpenoids, *Drechslera oryzae*, ophiobolins, phytotoxin, rice, 237
Step induction method, *Actinidia chinesis*, protoplast culture plant regeneration, 231
Stimulation by oxaloacetic acid (OAA), 5-aminolevulinic acid (ALA) synthesis, oxygen (O_2) requirement in the light, 185
Sucrose metabolism, photosynthesis, photorespiration, respiration, 11

Temperature, plasma membrane, H^+-ATPase, fusicoccin, Triton X-100, 117
Temperature, *Vicia faba*, pollination, culture in vitro, growth, cotyledon, 223
Tissue culture, fruit trees, protoplasts, electrophysiology, plant regeneration, 165
Tissue tension, auxin action, elongation growth, cell wall synthesis, 23
Tobacco mosaic virus, chitinase mRNA induction, β-1,3-glucanase mRNA induction, pathogenesis-related proteins, *Nicotiana tabacum*, 171
Triton X-100, plasma membrane, H^+-ATPase, fusicoccin, temperature, 117

Uncouplers, ellipticine derivatives, plant mitochondria, potato tuber, electron transport, cytochrome *c* oxidase activity, inhibitors, 109

Vesicle aggregation, abscisic acid, lipid vesicle, phospholipid, phospholipid bilayer, 245
Vicia faba, pollination, culture in vitro, temperature, growth, cotyledon, 223
Vinca minor, *Datura innoxia*, adaptation, callus culture, β-galactosidase, galactose, lactase, lactose, 83

Wheat haploids, chromosome doubling, nitrous oxide, colchicine, 219

Zea mays, calmodulin, Ca^{2+} transport, membrane vesicles, 103

Plant Science, 54 (1988) 255–256
Elsevier Scientific Publishers Ireland Ltd.

VOLUME CONTENTS

Volume 54 (1988)

REVIEW

Interorganellar sequence transfer: plant mitochondrial DNA is nuclear, is plastid, is mitochondrial
by W. Schuster and A. Brennicke (Tübingen, F.R.G.) 1–10

PHYSIOLOGY AND BIOCHEMISTRY

Photosynthesis and respiration in air-grown and CO_2-grown photoautotropic cell suspension cultures of carnation
by F. Rebeille (Saint Paul Lez Durance, France) 11–21

Interaction between cortical cylinder and epidermis during auxin-mediated growth in pea internodes
by U. Kutschera and W.R. Briggs (Stanford, CA) 23–28

Induction of two alcohol dehydrogenase polypeptides in rice roots during anaerobiosis
by K.-I. Kadowaki, M. Matsuoka, N. Murai and K. Harada (Yatabe, Japan) 29–36

Kinetics of proton secretion and growth in maize roots: action of various plant growth effectors
by H. Lüthen and M. Böttger (Hamburg, F.R.G.) 37–43

GENETICS AND MOLECULAR BIOLOGY

Jerusalem artichoke invertases — immunocharacterization of a soluble form and its putative precursor
by P. Goupil, Y. Croisille, F. Croisille and G. Ledoigt (Aubière, France) 45–54

CELL AND TISSUE STUDIES IN VITRO

Glyphosphate-tolerance in *Catharanthus roseus*
by R.C. Cresswell, M.W. Fowler and A.H. Scragg (Sheffield, U.K.) 55–63

In vitro plant regeneration from cotyledon fragments of the olive tree (*Olea europaea* L.)
by L.A. Cañas and A. Benbadis (Paris, France) 65–74

Ethylene generation and reversal of ethylene effects during development in vitro of rapid-cycling *Brassica campestris* L.
by Z. Lentini, H. Mussell, M.A. Mutschler and E.D. Earle (Ithaca, NY) 75–81

Selection of lactose-adapted cells in *Vinca minor* and *Datura innoxia* cultures: location and characterization of β-galactosidase and lactase activities
by O.C. Elavummoottil, S. Duret, A. Vannereau, L. Cosson and J.C. Mestre (Châtenay-Malabry, France) 83–91

PHYSIOLOGY AND BIOCHEMISTRY

Oleoyl-phosphatidylcholine molecular species desaturated in pea leaf microsomes — possible substrates of oleate-desaturase in other green leaves
by H. Serghini-Caid, C. Demandre, A.-M. Justin and P. Mazliak (Paris, France) 93–101

Separation of membrane vesicles from maize roots having different calcium transport activities
by G. Zocchi (Milano, Italy) 103–107

Interactions between ellipticine derivatives and the mitochondrial respiratory chain
by J. Dupont, G. Dodin and M.-A. Schwaller (Paris and Villejuif, France) 109–115

Effect of Mg^{2+}, Triton X-100 and temperature on basal and FC-stimulated plasma membrane ATPase activity
by M.I. De Michelis, C. Olivari, M.C. Pugliarello and F. Rasi-Caldogno (Torino and Milano, Italy) 117–124

Perturbation of alkaloid production by cadaverine in hairy root cultures of *Nicotiana rustica*
by N.J. Walton, R.J. Robins and M.J.C. Rhodes (Norwich, U.K.) 125–131

The interaction of senescence and wounding in oat leaves. II. Chlorophyll breakdown caused by wounding in light
by G. Giridhar and K.V. Thimann (Santa Cruz, CA) 133–139

Inhibition of nitrate reductase induction in germinating barley embryos by endosperm
by A.K. Gupta, A.K. Sharma, S. Guha-Mukherjee and S.K. Sopory (New Dehli, India) 141–145

CELL AND TISSUE STUDIES IN VITRO

Callus formation and plant regeneration capacity of apple embryonic axes and cotyledons in relation to seed dormancy
by I. Sińska (Warsaw, Poland) 147–152

Stimulation of growth in *Daucus carota* L. cell cultures by brassinosteroid
by D. Bellincampi and G. Morpurgo (Rome, Italy) 153–156

Characterization of a temperature-sensitive carrot cell mutant impaired in somatic embryogenesis
by F. Lo Schiavo, G. Guiliano and Z.R. Sung (Napoli, Italy and Berkeley, CA) 157–164

Electroporation-mediated improvement of plant regeneration from Colt cherry (*Prunun avium* × *Pseudocerasus*) protoplasts
by S.J. Ochatt, P.K. Chand, E.L. Rech, M.R. Davey and J.B. Power (Nottingham, U.K.) 165–169

PHYSIOLOGY AND BIOCHEMISTRY

Induction of the defense-related glucanohydrolases, β-1,3-glucanase and chitinase, by tobacco mosaic virus infection of tobacco leaves
by R. Vögeli-Lange, A. Hansen-Gehri, T. Boller and F. Meins, Jr. (Basel, Switzerland) 171–176

Active vanadate-sensitive H^+ translocation in corn roots membrane vesicles and proteoliposomes
by F. St. Marty-Fleurence, I. Bourdil, M. Rossignol and J.-P. Blein, (Dijon, France) 177–184

A re-examination of 5-aminolevulinic acid synthesis by isolated, intact, developing chloroplasts: the O_2 requirement in the light
by L. Huang and P.A. Castelfranco, (Davis, CA) 185–192

Decay of cytochromes and appearance of a cyanide-insensitive electron transfer pathway in *Euglena gracilis* grown in anoxia
by I. Carre, J.-L. Bomsel and R. Calvayrac (Paris, France) 193–202

Elicitor-induced accumulation of glyceollin and callose in soybean roots and localized resistance against *Phytophthora megasperma* f. sp. *glycinea*
by A. Bonhoff and H. Grisebach (Freiburg, FRG) 203–209

GENETICS AND MOLECULAR BIOLOGY

Genomic organization of the 28 kDa glutelin-2 gene from maize
by D. Gallardo, M. Reina, J. Rigua, A. Boronat and J. Palau (Barcelona, Spain) 211–218

CELL AND TISSUE STUDIES IN VITRO

Nitrous oxide as a possible alternative agent for chromosome doubling of wheat haploids
by F.L. Hansen, S.B. Andersen, I.K. Due and A. Olesen (Frederiksberg, Denmark) 219–222

Effect of temperature on growth of *Vicia faba* cotyledons in vitro
by H.M. Dekhuijzen, J. van Hattum and D.R. Verkerke (Wageningen, The Netherlands) 223–229

Plant regeneration from leaf callus protoplasts of *Actinidia chinensis* Planch. var. chinensis
by C.-K. Tsai (Cai Qi-Gui) (Beijing, China) 231–235

GENERAL

The phytotoxic ophiobolins produced by *Drechslera oryzae*, their structures and biological activity on rice
by C.-H. Yun, F. Sugawara and G.A. Strobel (Bozeman, MT) 237–243

Abscisic acid enhancement of lipid besicle aggregation
by B. Brengle, S.R. Wassall and W. Stillwell (Indianapolis, IN) 245–249
